Tracing Light Box

This Tracing Light box has been specially designed for treatment planning for orthodontics, it can also be used to enhance the clarity of diagnostic radiographs. **32cm x 49cm Screen:** Large enough to cope with the largest radiographs including lateral obliques.

Flat screen completely free from obstructions: Rulers, Protractors, etc. lie completely flat on the surface of radiographs during tracing procedures.

Intense fluorescent light: Makes tracing soft tissue outline much simpler.

DB06-0700
